AB - J03197414 Material contains a silicone oil(s) and a fatty acid ester(s) of glucose and/or an alkyl glucoside having a 1-4C alkyl gp. The ester has, e.g., a monoester content of at least 90%. The mono-ester is, e.g., at least one of glucose-6-decane monoester, glucose-6-gamma-linolate monoester, 1-methyl-6-capryl glucose, and 1-ethyl-6-oleyl glucose.
- USE/ADVANTAGE - Material imparting smoothness and wetness and has high dispersion stability.
